# Types of Incentive Applications

## Full PDF (this application) – Retrofit Project

Projects such as replacing existing equipment with new high-efficiency equipment, or retrofitting existing equipment to improve energy efficiency.

## Full PDF (this application) – New Construction Project

Projects that result in a permanent reduction in electrical (kWh) and/or natural gas (Mcf) energy use compared to baseline practices. The following project types are classified as New Construction/Major Renovation:

- New building wherein no structure or site footprint presently exists
- Addition or expansion of an existing building or site footprint
- Major tenant improvements that change the use of the space
- Projects that require added energy load

# Business Instant Discount Program

## Instant Savings, No Application Required

Simply purchase the products from participating distributors to receive the instant discount. Pages 47 and 48 contain a list of all eligible products. The incentive is a discount at the point of purchase from participating distributors.

For full details, visit: [ConsumersEnergy.com/InstantDiscount](https://ConsumersEnergy.com/InstantDiscount)

# Bonus Incentives

## Buy Michigan Bonus

Customers who use Michigan-made products in their energy saving projects may be eligible for an additional 20% bonus incentive. An affidavit from the manufacturer attesting the product is at least 50% manufactured and assembled in the state of Michigan (exclusive of packaging) is required. Look for the Buy Michigan column and check the box ( ☐ ) located next to eligible measures throughout the Application to receive your bonus.

# Incentive Caps and Limits

Incentives are subject to limits in order to encourage equitable distribution of funds among as many Consumers Energy customers as possible. Incentive caps are imposed annually and are calculated based on the program year in which the incentive is paid to the customer.

## Customer Annual Limits

The amount of incentives a facility or customer can receive is limited. A facility is defined as a single customer who is responsible for paying the Consumers Energy electric and/or natural gas bill. A customer is defined as the organization under which the company (or companies) is/are owned or operated, regardless of who is responsible for paying the bill. Program year incentive limits are per customer, facility, project or measure as shown below.

### Prescriptive Incentives

- 75% of the total project cost, and per measure, facility or project where specified in this Application or the Incentive Catalog

### Custom Incentives

- 50% of the total project cost

### Electric Customer Incentive Limit

- \$2 million across all facilities per customer

### Natural Gas Customer Incentive Limit

- \$1 million across all facilities per customer

### Natural Gas Customer Tiers per Customer

- 100% of the calculated natural gas incentive up to \$500,000 and 50% of the calculated natural gas incentive above \$500,000

# About This Application

Consumers Energy Business Energy Efficiency programs offer incentives to help businesses reduce energy use by improving the efficiency of their equipment. Prescriptive incentives are cash incentives for implementing many common energy efficiency improvements. Custom incentives are cash incentives for making certain energy efficiency improvements not covered by prescriptive incentives.

All Consumers Energy commercial and industrial customers are eligible for prescriptive and custom incentives.

## Pre-Notifications

A Pre-Notification Application is required for most projects, including all custom incentive and new construction projects. It is recommended for projects requesting incentives over \$10,000. Check the current Incentive Application and Catalog for the measures you plan to implement to see if a Pre-Notification Application is required.

### Retrofit Project Pre-Notification

- 1. Completed Applicant Information Sheet (page 6)
- 2. Supporting documentation (see Incentive Catalog for detailed descriptions of measures, equipment specifications and other requirements)
- 3. Specification sheets for all proposed equipment
- 4. Business energy efficiency measure worksheets for incentives requested

### New Construction Pre-Notification

Measures that may qualify for new construction are designated by a blue dot symbol ( ● ) on the left of the measure.

- 1. Completed Applicant Information Sheet (page 6)
- 2. Supporting documentation (see Incentive Catalog for detailed descriptions of measures, equipment specifications and other requirements)
- 3. Specification sheets for all proposed equipment
- 4. Business energy efficiency measure worksheets for incentives requested

**Need help?** Call 888-674-2770 or Email: [BusinessEnergyEfficiency@cmsenergy.com](mailto:BusinessEnergyEfficiency@cmsenergy.com)

## How to Apply

Submit Pre-Notification and Final Applications by email: **BusinessEnergyEfficiency@cmsenergy.com**

### Directions:

- Please save this form to your computer by selecting “File > Save As...” before filling out any information electronically. After filling out information, select “Save.” Note: This form requires Adobe Reader® version 11.0 or higher to function properly. Download it at [get.adobe.com/reader](http://get.adobe.com/reader)
- **Wait until your Application is approved before starting your project. Your reservation letter will state your project approval and the amount reserved.**

1

### Check Project and Equipment Eligibility

All installed equipment must meet or exceed specifications described in the Incentive Catalog available at [ConsumersEnergy.com/StartSaving](http://ConsumersEnergy.com/StartSaving)

2

### Submit Pre-Notification Application

Pre-Notification Applications are required for some projects (see page 4 for details) and recommended for projects requesting incentives exceeding \$10,000. Keep your Pre-Notification Application for your Final Application. Simply update the Application with the final information and move the check mark to the Final Application box at the top of page 6.

3

### Install Equipment and/or Complete Project

You have a total of 90 days (Retrofit) or 18 months (New Construction) to install equipment and/or complete your project and submit your Final Application. Contact the program team if your project will take longer.

4

### Submit a Final Application

You must submit your Final Application within 60 days of the completion date, or on or before the reservation expiration date, whichever occurs first.

#### **Attach the following (incomplete applications will be rejected):**

- |  |   |   |
|--|---|---|
| 1. Completed applicant information, customer signature and payment release, if appropriate (pages 6 and 7)                                 | 3. Dated and itemized invoices listing the model number, manufacturer, unit price and quantity of the installed equipment | 5. Specification sheets for installed equipment, if different from previously submitted |
| 2. Supporting documentation (see Incentive Catalog for detailed descriptions of measures, equipment specifications and other requirements) | 4. Scope of work depicting the type and quantity of installed equipment (as necessary)                                    | 6. Business energy efficiency measure worksheets for incentives requested               |
|  |   | 7. Copy of payee's W-9  |

5

### Receive Incentive Payment

When Final Application is approved, an incentive check will be mailed to you or your designee. Checks are typically mailed within 6 to 8 weeks.

## Terms and Conditions

I certify that Customer is an eligible Consumers Energy Company (“Consumers Energy”) customer and that the indicated energy efficiency measures were installed between December 1 and November 30 (the “Program Year”). The energy optimization measures are installed in a qualifying Customer facility, with a qualifying Consumers Energy account, paying the Energy Waste Reduction surcharge, not for resale, and meet all of the terms and conditions in the Business Energy Efficiency Programs Policy and Procedures Manual (the “Manual”) available at [ConsumersEnergy.com/StartSaving](https://ConsumersEnergy.com/StartSaving)

**Incentives.** I understand that in the event that Customer received a reservation, that reservation is not a guarantee of payment. Incentive payment will be based upon the final application meeting the Program requirements. Customer acknowledges that incentives will be paid only if: (a) Customer(s) and installed measure(s) or services meet the Program eligibility requirements and the requirements outlined by the Program; (b) measures are installed in eligible project sites; and (c) measures are installed at a project site that has not received incentives from any other of Consumers Energy’s energy efficiency programs for the same measure(s). Customer understands that Consumers Energy, in its sole discretion, may withhold incentive payments committed to Customer if a project site is proven ineligible or a project otherwise does not comply with the requirements set forth by the Program.

- Project funds are reserved for 90 days from the date of the reservation letter (18 months for New Construction projects). Inside the 90-day and 18-month timeframe, you must submit your Final Application within 60 days of your project completion.
- The Program has a limited budget, but is an annual program. Applications will be processed until allocated funds are fully subscribed or spent each program year. Incentive amounts are subject to change at any time within the program year; however, reserved incentive amounts will be honored within a program year.
- New Construction Final Applications must be received by November 30 of the program year to qualify for the current year’s funding. Multi-year project incentives may vary in accordance with program year changes.
- All equipment must be purchased and installed prior to submitting the Final Application.
- All equipment installed must meet the minimum specifications as stated in the Incentive Catalog and these Terms and Conditions. Failure to meet the minimum specifications will result in disqualification of the measure or incentive payment.
- Incentives may be taxable, and the applicant is solely responsible for the payment of any resulting taxes. Incentives will be reported to the IRS, unless applicant is a corporation or tax exempt. W9 will be required for payments.
- From the project completion date the applicant may be required to refund some or all of the incentives if the measures do not remain (or were not) installed for a period of five (5) years or until the end of the product life, whichever is less.
- All materials removed, including lamps and PCB ballasts, must be taken out of service permanently and disposed of in accordance with local, state and federal codes and ordinances. The Applicant is responsible for being aware of any applicable codes or ordinances. Information about hazardous waste disposal may be found at [Michigan.gov/egle](https://Michigan.gov/egle)
- For certain measures, the incentive amount will be determined based on the estimated energy savings.

**Auditing and Verification.** Customer also agrees to allow Consumers Energy and Implementer to access its facilities for the purpose of confirming Customer’s participation in the Program, inspecting projects and verifying the energy savings achieved through the Program for up to five (5) years from the project completion date. Customer agrees to cooperate with Consumers Energy and Implementer, as necessary. Customer also agrees to remedy any issue arising from auditing and monitoring results within the timeframe provided by the Program. Customer understands that any incentives may be withheld if Customer refuses to participate in any required verification within a reasonable period. Customer verifies that all projects are installed in accordance with all applicable federal, state and local laws and manufacturer’s specifications. Customer may be required to provide documentation on energy savings calculations and assumptions.

Consumers Energy will make the final determination of the energy savings and thus the incentive amount to be paid.

Consumers Energy has no obligations regarding and does not endorse or guarantee any claims, promises, work or equipment made, performed or furnished by any contractors or equipment vendors that sell or install any energy efficiency measure.

- I have read and understand the Program Requirements, Measure Specifications and Program Guidelines set forth in this Application, the Incentive Catalog and the Program Policy and Procedures Manual and agree to abide by those requirements. Furthermore, I concur that I must meet all eligibility criteria in order to be paid under this program and not receive incentives from any other utility for the same project.

**Confidentiality.** I understand that Consumers Energy and its authorized agents may utilize Customer’s account information

## Terms and Conditions (Continued)

and project scope to evaluate this Application and the project for compliance with the Manual and these Terms and Conditions. I authorize Consumers Energy to utilize certain information including Customer company name, energy savings and incentive value for regulatory and promotional purposes. If I choose to subsequently opt out of any recognition, I must indicate this choice in a written letter to Consumers Energy or Implementer. Consumers Energy will not sell, rent or lease our subscription lists to third parties, and we will not provide your personal information to any third-party individual, government agency or company except as described in this paragraph at any time unless compelled to do so by law. Consumers Energy and Implementer will use your email address solely to provide timely information about the Consumers Energy Business Energy Efficiency programs and your projects.

- Reserved incentive amounts are not guaranteed and the actual amounts will be based on a review of the final application and supporting documentation (and may be capped at the reserved amount).
- The final incentive amount will be based on the program requirements for the program year for which the incentive is paid.

**NO WARRANTY.** CONSUMERS ENERGY AND IMPLEMENTER MAKE NO REPRESENTATIONS OR WARRANTIES, AND ASSUME NO LIABILITY WITH RESPECT TO QUALITY, SAFETY, PERFORMANCE OR OTHER ASPECT OF ANY PROJECT AND EXPRESSLY DISCLAIM ANY SUCH REPRESENTATION, WARRANTY OR LIABILITY, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT. NOTHING IN THIS AGREEMENT SHALL BE CONSTRUED TO CREATE ANY DUTY TO, ANY STANDARD OF CARE WITH REFERENCE TO OR ANY LIABILITY TO ANY THIRD PARTY. NEITHER CONSUMERS ENERGY NOR IMPLEMENTER SHALL BE RESPONSIBLE FOR COSTS OR CORRECTIONS OF CONDITIONS ALREADY EXISTING IN THE FACILITIES INSPECTED WHICH FAIL TO COMPLY WITH APPLICABLE LAWS AND REGULATIONS.

**LIMIT ON LIABILITY.** TO THE EXTENT ALLOWED BY LAW, CUSTOMER AGREES TO INDEMNIFY CONSUMERS ENERGY AND IMPLEMENTER AGAINST ALL LOSS, DAMAGES, COSTS AND LIABILITY ARISING FROM ANY CLAIMS RELATED TO ANY PROJECTS OR SERVICES PERFORMED IN CONNECTION WITH THE PROGRAM. NEITHER CONSUMERS ENERGY, IMPLEMENTER NOR CUSTOMER SHALL BE LIABLE TO EACH OTHER FOR ANY INCIDENTAL, SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES RELATED TO THIS APPLICATION.

**Governing Law.** This Agreement shall be deemed to be a Michigan contract and shall be construed in accordance with and governed by the laws of the State of Michigan, without regard to its choice-of-law principles. The parties agree that all actions arising out of this Agreement shall be filed exclusively in a state or federal court located in Michigan. The parties further agree to consent to any motion to transfer venue of a civil action involving this Agreement that is filed in another venue, and the parties waive the right to challenge such a motion, whether on grounds of forum non conveniens or any other basis regarding the appropriateness of venue in Michigan.

ID	Measure	Incentive	Unit	# of Units	Total Incentive
LT127	T8 or T12 2-ft or 3-ft Lamp Removal	Must be combined with an LED Tube Light measure (LT101 – LT126)	\$1.50	Lamp Removed	
LT128	T8 or T12 4-ft Lamp Removal		\$5.00	Lamp Removed	
LT129	T8 or T12 8-ft Lamp Removal		\$12.00	Lamp Removed	

\*Notes: UL Type A: TLEDs are used as a direct replacement for existing fluorescent tubes, reusing the existing fluorescent ballast and lamp holders to connect the TLED to the fixture.

UL Type B: TLEDs typically use the lamp holders (either existing or retrofitted) to connect the TLEDs to the existing fluorescent fixture and the existing fluorescent ballast is bypassed or removed. TLEDs have internal drivers and run off line voltage.

UL Type C: TLEDs are connected to the low-voltage side of a new TLED external driver and the existing fluorescent ballast is disconnected and fully removed from the existing fluorescent fixture.

Dual Mode (DM) Internal Drivers (UL Type A and Type B): TLEDs may operate off the existing fluorescent ballast or be rewired to operate off line voltage. They have the same requirements as Type A or Type B TLEDs.

Total Incentive												

\*Total incentive is determined by summing the qualifying base incentive and maximum incremental incentive. The incremental incentive rate is per 0.01 kW/ton FLV or IPLV reduction from the required minimum efficiency, and the maximum incremental incentive is applied, Path A or Path B.

- For example: One 100-ton air-cooled chiller at 0.75 kW/ton IPLV and 1.15 kW/Ton FLV
  - Base Incentive:  $(A \times D \times F)$  or 100 tons x 1 x \$7/ton = \$700
  - Path A – Full Load Incentive:  $(A \times D \times [(E - B)/0.01] \times G)$  or 100 tons x 1 x  $[(1.19 - 1.15)/0.01] \times \$2.00 = \$800$
  - Path B – Part Load Incentive:  $(A \times D \times [(H - C)/0.01] \times G)$  or 100 tons x 1 x  $[(0.76 - 0.75)/0.01] \times \$2.00 = \$200$
  - Total Incentive: Base Incentive + Maximum (Path A, Path B) or \$700 + Maximum (\$200, \$800) = \$1,500

The following documentation must be included with the Incentive Application in addition to the documentation outlined above. If possible, the LEED® online portal should be shared with program staff as an efficient means of providing project information. Energy savings will be validated per the LEED® review findings listed below.

- LEED® Certification Project Review Report and LEED® Reviewer's Comments
- LEED® 2009-EA Prerequisite 2: Minimum Efficiency Use Performance Form: This form details the building's Performance Rating Method Compliance and Total Building Energy Summary.
- EAp2 Section 1.4 Table.xls from all supporting documentation submitted with the LEED® template
- By applying for the Consumers Energy LEED® Whole Building Incentive program you are authorizing Consumers Energy staff to contact USGBC/GBCI to request the final approved LEED® report and EAp2 Section 1.4 Table.xls. To streamline this process, you have the option to provide the project LEED® online access credentials to Consumers Energy staff to view the final approved reports.

You know your business best. We'd like to work with you to find creative, custom and effective ways to upgrade the energy efficiency of your operations. We'll support your efforts with rebates based on the amount of energy you save over your base annual energy use.

Eligible natural gas customers will receive \$12 per Mcf of natural gas saved, up to \$500,000 each year with an additional 50% of calculated rebates above \$500,000. Consumers Energy electric customers will receive \$0.10 per kWh of electrical energy saved per year, up to \$2 million across all facilities per customer. All custom incentives are capped at 50% of the total project cost. The Business Energy Efficiency program is one of several programs designed to help you save energy and money while protecting the planet. Together, we can take an active role in building a clean energy future for Michigan. Learn more at [MICleanEnergy.com](https://www.micleanenergy.com)

Please attach supporting documentation as described in the Consumers Energy Business Energy Efficiency Programs Incentive Catalog and/or the Program Policies and Procedures Manual.

Variable Frequency Drive Information Worksheet

Completed worksheet must be included with the Incentive Application for all custom incentive VFD projects and where specified for prescriptive VFD measures. In addition, applicants must complete a minimum of seven continuous days of line-side (NOT load-side) power monitoring before (if retrofit) and after installation (it is recommended to meter power every 15 seconds).

Fan / Pump Information

Fan or pump ID tag (from worksheet):  
If fan, note type (centrifugal, forward curve, backward curve, axial, etc.):  
Nominal horsepower (HP) (if multiple motors, list individual HP ratings):  
Manufacturer:  
Full-load design conditions: Flow (CFM, GPM):  
Existing controls (discharge damper, inlet guide vanes, outlet control valve, bypass valve, etc.):

Type of area served by fan or pump:  
Equipment served by fan or pump:  
Nameplate motor efficiency (if multiple motors, list individual efficiencies):  
Model:  
Pressure (inches static, feet of water, PSI, other):  
Existing setpoint (inches static, feet of water, PSI, other):

Operation Hours

The fan or pump operates the following hours (e.g., 0600 to 1800 or on demand):

Summer	Winter
Weekdays _____ to _____	Weekdays _____ to _____
Saturdays _____ to _____	Saturdays _____ to _____
Sundays _____ to _____	Sundays _____ to _____
Number of shifts per weekday: _____	Number of shifts per weekend day: _____

Existing Motor Load

The fan or pump operates the following hours (e.g., 0600 to 1800 or on demand):

Option 1 (Retrofit):

Measured input power under full load: \_\_\_\_\_ kW (true RMS power), \_\_\_\_\_ Power Factor (PF)

Option 2 (Retrofit):

Measured current and voltage under full load: \_\_\_\_\_ Amps \_\_\_\_\_ Volts  
Three-phase load calculation = \_\_\_\_\_ Amps x \_\_\_\_\_ Volts x \_\_\_\_\_ PF x 1.73 / 1,000 = \_\_\_\_\_ kW

Option 3 (Retrofit or New):

Measured or estimated fan or pump full load: \_\_\_\_\_ kW  
If estimating load, provide description, assumptions and formula used to calculate power:  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Proposed Operations

The proposed VFD will be automatically controlled to maintain the following setpoints: \_\_\_\_\_

Flow (CMF, GPM, other): \_\_\_\_\_ Pressure (in static, feet of water, PSI, other): \_\_\_\_\_

If other, please describe: \_\_\_\_\_

Compressed Air Correct Sizing Worksheet

Completed worksheet must be included with the Incentive Application when applying for the Correct Sizing Air Compressor (CA124) measure incentive. In addition, applicants must complete a minimum of seven continuous days of power monitoring before and after retrofit (it is recommended to meter power every 15 seconds).

	Existing/Baseline	Proposed/Post

Affidavit of Natural Gas Infrared Heater Minimum 5 Degrees Fahrenheit Setpoint Reduction

I, \_\_\_\_\_, declare that after installing an infrared radiant (IR) heater I will set the occupied temperature setpoint of the new IR heater a minimum of 5 degrees Fahrenheit lower than the occupied setpoint temperature of the previous or baseline forced-air heating system (e.g. unit heaters, furnaces, etc.). An example would be if a space maintained at 70 degrees Fahrenheit by a previous unit heater would now be set back to a maximum temperature of 65 degrees Fahrenheit maintained by the new IR heater. Please note that in most cases, the thermostat setpoint reduction accounts for most of the fuel savings of IR heaters over conventional forced-air heating systems.

I further declare that:

I am an authorized representative of company purchasing the new IR heater (i.e., Customer or End User).

Occupied Thermostat Setpoint of the previous or baseline forced-air system: \_\_\_\_\_ degrees Fahrenheit.

Occupied Thermostat Setpoint of the new IR heater: \_\_\_\_\_ degrees Fahrenheit (must be at least 5 degrees Fahrenheit lower than the current or baseline thermostat setpoint).

Name and Address of the Customer (Company) Receiving the IR Heater:

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Signature: \_\_\_\_\_

Printed Name: \_\_\_\_\_

Title: \_\_\_\_\_

Date: \_\_\_\_\_

Please note: To be eligible for an infrared heater incentive from the Consumers Energy Business Solution Energy Efficiency programs, the new IR heater thermostats must be set back a minimum of 5 degrees Fahrenheit lower than the previous or baseline forced-air heating system.
