

## Energy Transition

### ASSESSMENTS

#### Preparing for a cleaner tomorrow

Making the transition from one energy source to another can seem like a challenging undertaking, that's why we've made it as easy as possible to access and deliver insights about your customers' energy usage and how to reduce it. We offer traditional in-person assessments as well as virtual assessments and online analytics, so managing energy can happen wherever you are.

#### We assess your next steps so you don't have to.

Since everyone's energy goals are unique, we've designed assessments that are customizable, approachable and easy to use for any customer, regardless of how far along they are in their transition to clean energy.

##### ① Standard in-person assessments

Standard assessments give homes and businesses alike a complete picture of how they use energy and a clear, personalized path to switch to cleaner energy sources.

##### ② Virtual assessments

Our on-demand virtual assessments connect customers with trained energy experts to complete a full evaluation of their energy habits. We can also approve customers for any needed direct install upgrades included in their program, right from your phone or tablet.

##### ③ Analytics and reporting

Like everything we do, our energy assessments are backed by experience and driven by data. We integrate third-party sources as well as internal data to deliver personalized next steps and manageable recommendations to help customers break away from carbon-producing sources of power and adapt to the future of clean energy instead.

#### CLEAResult ATLAS™

Our unifying technology solution at a glance:

- ✓ Universally compatible management platform
- ✓ Vastly increased speed to market
- ✓ Near-limitless program scaling and expansion
- ✓ Streamlined third-party integration
- ✓ Cost-effective program delivery
- ✓ Increased average savings per customer
- ✓ Improved customer engagement and satisfaction

#### Key areas of focus

##### Fulfillment

Making sure everyone in your community has more access to clean energy choices.

##### Installation

Rolling up our sleeves to make the switch to cleaner energy products, storage and generation solutions.

##### Management

Continuously improving the transition to sustainable energy sources at every turn.

We change the way people use energy, *for our future.*
